On May 5, 2020, Match Group, Inc. (the “Company”) filed with the Securities and Exchange Commission pursuant to Rule 425 under the Securities Act of 1933, as amended, an excerpt of a Letter to Shareholders (the “Original Filing”). The original Letter to Shareholders and the excerpt included in the Original Filing contained an error in the chart reflecting the Company’s debt maturity schedule. A corrected Letter to Shareholders has been posted on the Company’s website and this filing includes the following corrected excerpt.

IAC Separation

We have filed the proxy statement for the separation from IAC and expect to hold a virtual shareholder meeting on June 25th and close the transaction after satisfying the applicable closing conditions, including obtaining required shareholder approvals at both Match Group and IAC. As of April 30th we had cash on hand of nearly \$900 million. We will use our cash on hand to pay the \$3 per share consideration, or approximately \$850 million in aggregate, to Match Group shareholders and IAC under the terms of the separation. We can access our \$750 million undrawn credit facility should we need to.

We currently expect to have net leverage slightly below 5x when the separation closes, including assumption of the IAC Exchangeables. That is a little higher than we were initially expecting, in part because we now expect our adjusted EBITDA for the first half of the year to be a little lower. Given we expect to convert more than 70% of our adjusted EBITDA to free cash flow, we believe this leverage level remains very manageable for us. We also expect that we’ll de-lever a little more slowly, as our adjusted EBITDA going forward likely will be lower than we had originally anticipated as the effects of the virus linger. That said, based on our current financial outlook, we remain confident that we will de-lever to under 3x net leverage within 18 months following the separation, absent any non-operating uses of cash such as M&A.

We also believe we have a balanced debt maturity schedule. As you can see from the chart below, the only debt maturities we will have prior to 2026 are one \$400 million senior notes maturity in 2024, and the IAC Exchangeables due in 2022 that will transfer in the separation. The IAC Exchangeables are currently in-the-money, meaning that at current share prices we retain the flexibility to settle them in cash or stock.
