The Company's primary metric is Operating Income Before Amortization, which is defined as operating income excluding, if applicable: (1) non-cash compensation expense, (2) amortization of non-cash marketing, (3) amortization and impairment of intangibles, (4) goodwill impairment and (5) one-time items. The Company believes this measure is useful to investors because it represents the operating results from IAC's segments, taking into account depreciation, which it believes is an ongoing cost of doing business, but excluding the effects of any other non-cash expenses. Operating Income Before Amortization has certain limitations in that it does not take into account the impact to IAC's statement of operations of certain expenses, including non-cash compensation, non-cash marketing, and acquisition related accounting. IAC endeavors to compensate for the limitations of the non-GAAP measure presented by providing the comparable GAAP measure with equal or greater prominence and a reconciliation of the non-GAAP measure to net earnings (loss) attributable to IAC shareholders. The information presented above should be read in conjunction with IAC's historical consolidated financial statements and notes thereto found on the U.S. Securities and Exchange Commission's website at http://www.sec.gov.
