¹ Shares to be settled at maturity at the exercise price of the warrant and are subject to incremental dilution if the stock price is greater than the warrant price.

² Simplified example; does not reflect required adjustments to the strike price to be made after the Closing per the Warrant Agreements related to Volatility and Liquidity.

Exchangeables Collar Calculation

- IAC shareholders' stake in New Match to be reduced by the fair market value of the Exchangeables, divided by Match Group stock price VWAP
- For purposes of that calculation, the Match Group stock price VWAP will be capped at a +/- 25% collar of the Match Group VWAP ending on the trading day before signing less \$3.00 (cash consideration)
- If the Match Group VWAP ending 5 days prior to transaction close less \$3.00 is below the Minimum Collar, and Match Group does not provide notice that it accepts the collared price, IAC has the right to terminate the transaction.
- If the Match Group VWAP ending 5 days prior to transaction close less \$3.00 is above the Maximum Collar, and IAC does not provide notice that it accepts the collared price, Match Group has the right to terminate the transaction.

Note: Illustrative calculation assumes Match Group share price as of December 17, 2019 close.

¹Excludes potential dilution from Exchangeable Notes due 2027 and 2030 because Exchangeable Notes are not currently in-the-money; excludes potential dilution from Exchangeable Notes due 2022 because it is the Company's intention to settle those Exchangeable Notes with cash equal to the face amount of the notes and any shares issued would be offset by shares received upon exercise of the Note Hedge; excludes potential dilution from the Warrants associated with all three Exchangeable Notes because the warrants are not currently in-the-money.
